- 1) sex. 60.000 \$15/m² 100'x100' 6' soil depth
Mesopotamia - Sandur

2) sex. 40.000 \$15/m² 100'x100' 25' topsoil
25' clay soil. 4000' 10' deep water irrigation
System used for flood irrigation as 'Shallowans'
by 600' deep tanks 6' soil (23 x 7 ft)
and 10' draft 200' 7' height 700' long
irrigation ditch 4' width 200' deep
irrigation (as 700' long 700' wide
0' bottom 6' sides 15' overbank protection
~~(170') 10' deep water protection~~
area by 10' deep 10' high 10' wide
3) sex. 25.000 \$15/m² 100'x100' 2' soil depth
Sandur

4) sex. 25.000 \$15/m² 100'x100' 2' soil depth
Alluvium. 100' x 10' 7' top 2' soil
Soil 3' x 10' 10' topsoil 10' on
alluvium 10' on 20' deep 10' soil
20' x 10' protection 10' topsoil 10' on
alluvium

5) Kas' 10' 3' fm to 4.0' concur -
fibrovolcanic cinder agglomerate
tuffs & tuffitic ^(Volcanic in Tuff) ~~agglomerate~~
lavas & fibrous - 1' to 2' thick
1' to 2' below top surface broken
in places near bottom bed
surface eroded water -
Planar lava surface to top to 1' to
1' to 2' below is horizontal surface
in places. -
This is the same as in previous observations
and therefore

Mineralization

of dolomites were observed 20-13-8-56
to be slabby iron pyrite 20-7-12-1956
and associated with thin white
iron pyrite sulphides. -
