The performance was inspired from the Holy book "THE REVELATION" written by the prophet "Saint John the Divine".

It combines music, chorus, theatrical action and also visual material, which is projected during the performance.

The play has nine Acts which reflect the relationship between "The Revelation" of St. John the Divine and the condition of the humanity today, as the director and the group viewed it.

"Apocalypsis" was first performed in 1999 in Mytilene, Greece. Since then its structure has undergone occasional modifications. Its latest form, which will be presented in the Girona Festival, was shaped in November 2003.
